## PROFESSIONAL SUMMARY

**Senior Software Engineer (Elixir | Go)** with over 8 years of experience in software engineering, with the last four focused on backend development and prior experience as a fullstack engineer. Specializing in **Elixir** and distributed systems, with strong expertise in building REST APIs, CronJobs, and Background processing systems, and infrastructure as code. Hands-on experience with backend frameworks such as **Phoenix** (**Elixir**), **Gin** and **Echo** (**Go**), **.NET Core** (**C#**), and **NestJS** (**TypeScript**/**JavaScript**), as well as frontend technologies like **Angular**, **Vue.js,** and **Ionic** for mobile. Proficient in cloud infrastructure (**AWS**, **GCP**, **Azure DevOps**) and DevOps practices, using tools like **Kubernetes**, **Terraform**, **Helm**, and observability platforms such as **Datadog** and **Observe** to ensure system reliability and performance. Applies best practices in software architecture, including **event-driven** design and **microservices**, to build and scale reactive systems using **RabbitMQ** and **Kafka** as message brokers. Results-driven, with a proven track record of optimizing performance and **scalability** in critical systems, and automating processes to accelerate delivery and improve operational **efficiency**.

## TECHNICAL SKILLS

- **Languages & Frameworks:** Elixir (Phoenix), C#, .NET Core, JavaScript, TypeScript, NestJS, Angular, Vue.js
- **Infrastructure & DevOps:** Terraform, Helm, Kubernetes, Docker, Kafka, RabbitMQ, LXC
- **Cloud & CI/CD:** AWS, GCP, Azure DevOps, Jenkins
- **Databases:** PostgreSQL, MySQL, MariaDB, MSSQL, Redis, MongoDB
- **Testing & Monitoring:** Jest, Cypress, ExUnit, XUnit, OpenTelemetry, Datadog, Observe

## LATEST PROFESSIONAL EXPERIENCES

### Senior Software Engineer - Swap, São Paulo - Remote (2022 – Present)

- Focused on backend development with **Elixir**, specializing in card issuance, payments, and banking systems
- Strong domain expertise in PIX, QR Codes, logistics, embossing, parallel and background processing
- Hands-on with **cloud infrastructure** using **Terraform**, **Kubernetes**, and **Helm** for deployments on **AWS** and **GCP**
- Experience in observability and monitoring using **Datadog**, **Observe**, and **OpenTelemetry**

- Daily application of **Agile methodologies** in cross-functional teams to deliver scalable, high-performance financial solutions

### Senior Software Engineer - Jaya Tech, Brazil (2020 – 2022)

- Worked as a backend engineer at Jaya, a company focused on people development in tech
- Built services using **NodeJS (NestJS)**, **Clojure**, and later specialized in **Elixir (Phoenix)**
- Used tools like **Retool** to build internal solutions and dashboards
- Worked with **PostgreSQL** for data modeling and queries
- Deployed and maintained projects on **AWS**

### Software Developer - ITIX, Brazil (2019 – 2020)

- Worked as a Fullstack Developer on national-scale (Brazil) products in the healthcare and insurance sectors
- Built and maintained features across the frontend and backend, ensuring stability and performance
- Backend: .NET Full Framework, .NET Core, ElasticSearch, Dapper, XUnit
- Frontend: AngularJS, Angular 2+, Ionic 4+, Cordova for mobile
- Cloud: Used Azure DevOps, WebJobs, Pipelines, Boards, and Repos
- Databases: MSSQL (SQL Server) and MySQL

### Software Developer - SEFAZ, Brazil (2018 – 2019)

- Worked on internal systems for **SEFAZ** ("State Department of Finance"), focused on development and maintenance using the **Microsoft ecosystem**
- Built and supported apps with **.NET Core**, **.NET Framework**, **Razor**, and **WebForms**
- Handled CI/CD processes with Jenkins
- Also worked with **Laravel** and **Lumen** for microservices and APIs
- Integrated systems using **RabbitMQ** for asynchronous communication
- Used **PL/SQL with Oracle**, **SQL Server**, and **MySQL** for database operations

## EDUCATION

**Bachelor of Science in Information Systems,** Salesiano College **–** Brazil **(2017–2020)**

**Activities and Societies:**

- Open-Source Software User Group
- Java User Group
- C Programming and Software Engineering study group

**Scholarship:**

- Awarded a **100% scholarship through PROUNI**, a Brazilian government program for high-performing students based on ENEM scores

## COURSES

- MasterCard Digital Payments (MasterCard Training)
- Clojure: The Complete Beginner's Guide (Udemy)
- Elixir for Programmers (Dave Thomas)
- Scrum Foundations Professional Certificate (SFPC)

## LANGUAGES

- **Portuguese** – Native
- **English** – Intermediate
